

The New Audi Q8 E-tron

Zero emissions, fully electric, with innovative recycling technology and carbon-neutral production: drive away in luxury-class comfort that doesn't cost the earth.

Power:

The Q8 e-tron may be the new kid in town, but that doesn't mean it's slow off the starting block. With an acceleration of 0 - 62mph in just 5.6 seconds, intelligent recuperation, and intuitive MMI Navigation as standard, this all-wheel drive knows where it's going.

Performance:

The capability to charge from 10-80% in just 31 minutes, a range of up to 330 miles and plenty of room for five people, means the Q8 is both spacious and efficient. Available in both SUV or Sportback options and eleven different colours, it unites outstanding performance with stunning design.

Protection:

A pre-sense safety system, lane departure warning and automated emergency braking make up just some of the features that come as standard. Combining safety with their trademark reliability, let Audi worry about the little things whilst you enjoy the ride.

With a top speed of 124 mph, a virtual cockpit, impressive aerodynamics and starting at just £68,595, take flight in your own, custom-built Audi Q8 e-tron, today.
